WORK EXPERIENCE

Analytics Consultant

Jan 2024 – Present

Arro Financial Communications

Remote

- Designed, tested, and developed a regulation-compliant analytic tool to elicit each client’s financial and psychological preferences and match them to product recommendations.

Senior Analyst, Investment Strategy Group

Nov 2022 – Oct 2023

The Vanguard Group Inc.

Malvern, PA

- Analyzed both transaction data and survey data using SQL and Python, created data visuals, and built story-driven decks to present results and contribute to product decision-making.
- Led the implementation of a new tech stack (GitHub Copilot, SageMaker, Athena) and creation of a team data lake in S3 (AWS), improving team productivity by broadening data access and accelerating analysis.

Analyst, Investment Strategy Group

May 2021 – Nov 2022

The Vanguard Group Inc.

Remote

- Pulled, cleaned, and combined external and internal data to build a Python and Excel-based analytic dashboard to inform product marketing.
- Iterated on platform design with stakeholders, adapting to competing requests and transparently prioritizing new features, leading to the publication of dashboard-automated charts in the quarterly product reviews.

Analyst, Center for Analytics and Insights

June 2019 – May 2021

The Vanguard Group Inc.

Malvern, PA

- Founded the applied behavioral science team and launched an in-house experimentation lab, replacing third-party research vendors and reducing testing costs by ~60%.
- Managed backlog of digital experiments, independently owning research design and data analytics from start-to-finish and presenting findings to senior leadership to inform call center and advisor-client interactions.

Researcher, Behavioral Economics

Aug 2014 – Dec 2018

Yale University

New Haven, CT

- Managed 20+ research projects spanning digital choice environments and customer insights with the Yale Center for Customer Insights (YCCI), presenting results to YCCI business affiliates.
- Collaboratively defined research agenda and independently executed literature reviews, data gathering, and analytics using R and Python; co-authored two behavioral economics journal articles with Yale faculty.

Teaching Assistant

Aug 2014 – Dec 2017

Yale University

New Haven, CT

- Led weekly sections and advised students on problem sets for four PhD-level courses in Operations Research and three MBA-level courses in Marketing.
- Covered topics in optimization, queuing theory, stochastic processes, and modeling.

EDUCATION

Yale University

- PhD, Management (Marketing Track) - 2018
- MA, Management - 2014
- BA, Economics - 2012
